LCD Monitor & Notebook Stand Ergonomic Solutions

Anyone working at a computer often adopts the same cramped posture. And moreover you always make the same movements. Which readily results in painful complaints such as cold hands, tingling fingers, a tennis elbow, and pain in the neck or shoulders. These are collectively known as “RSI”(Repetitive Strain Injury), the name for muscle and tendon complaints between the neck and fingertips caused by long-term use of the same muscles. We offers you ergonomic work area accessories that make work at the computer more comfortable and efficient.
